

TYPICAL AC MOTOR WINDING FAILURES

**#1 Winding Single Phased  
(Y Connected)**

**#2 Winding Single Phased  
(Delta Connection)**

**#3 Winding Shorted  
Phase to Phase**

**#4 Winding Shorted  
Turn To Turn**

**#5 Shorted Connection**

**#6 Winding Grounded In Slot**

**#7 Winding Grounded At Edge Of Slot**

**#8 Winding With Shorted Coil**

**#9 Too High Of An Unbalanced Voltage**

**#10 Damage Due To Overload**

**#11 Damage Caused By Locked Rotor**

**#12 Winding Damage Caused By Voltage Surge**
